PROFESSIONAL SUMMARY

Backend-focused software developer. I build REST APIs and internal tools in Go for the Government House of the Province of Chaco, with SQL Server databases, JavaScript web interfaces and Docker deployments on Linux servers. Experience with web projects using React, TypeScript, Laravel and MySQL. University Programming Technician student (UTN).

EXPERIENCE

Software Developer (Internship)	Apr 2026 – Present
Government House of the Province of Chaco · Resistencia, Argentina	
- Built a web-based inventory system in Go with SQL Server to manage equipment, supplies, loans and stock movement history, replacing manual tracking in Excel spreadsheets. - Designed a layered architecture (HTTP handlers, services and interchangeable SQL Server / Excel repositories) exposing a REST API with search, filtering, sorting and pagination. - Implemented SQL migrations and command-line tools to migrate existing data from Excel spreadsheets into the database. - Developed an administrative document generator: a Go HTTP API and web interface that produce DOCX files and convert them to PDF with headless LibreOffice. - Deployed the services with Docker and Docker Compose on Proxmox servers, using hardened containers (read-only file system, no extra privileges) and log rotation. - Wrote automated Go tests for handlers, services and repositories, plus JavaScript frontend tests.	

PROJECTS

Income Manager (Gestor de Ingresos) (Personal project)
Full-stack personal finance application to record income, expenses and transfers between accounts, with a dashboard of balances by account and currency and a category breakdown. Go REST API with search, filtering and pagination, integer-based amounts to avoid rounding errors, and backend and frontend tests. Technologies: Go, React, TypeScript, Vite, Excel (excelize)
Horizonte Global (Freelance project)
Multilingual landing page and navigable CRM for a travel and international mobility agency, with clients, cases, documents, calendar and team modules. Frontend demo with mock data. Technologies: React, React Router, Tailwind CSS, Vite
Pizzeria Management System (Academic project)
Full-stack application with CRUD for customers, pizzas, orders, categories and promotions, role-based access control, a shopping cart and Excel and PDF report exports. Technologies: Laravel, PHP, React, Inertia.js, MySQL, Tailwind CSS

EDUCATION

University Programming Technician · National Technological University (UTN), Resistencia	2022 – Present
Advanced Python Course	2024

SKILLS AND LANGUAGES

Programming: Go, JavaScript, TypeScript, SQL, PHP, Python, HTML, CSS. Also: Java, C, C#
Backend: REST APIs, Laravel, Django / Django REST Framework, FastAPI
Frontend: React, Inertia.js, React Router, Tailwind CSS, Vite
Databases: SQL Server, MySQL, PostgreSQL, SQLite, Redis
DevOps and tools: Docker, Docker Compose, Linux, Proxmox, Git
Methodologies: Scrum, Kanban
Languages: Spanish (native), English (advanced)
